

X ACT TV
SIMPLY SUPERIOR

Dear Valued Customer,

**You have just purchased the very finest Media Streaming System,
Hardware & Software configurations available. Not all Android Media
Streaming Devices are built alike, even if they claim to or look identical.**

**Our TV PLUS “WICKED” Systems are all without exception Hi-END
Quality and have internal components, specifications & advanced
functionality that well surpass any and all other lookalike system. TV
PLUS may cost a little more because we choose to offer our clients a
superior product over an inferior system that just won’t last. So it is no
surprise that we’re not trying to be the cheapest, just the Very BEST!**

**We stand behind all our Products with our World Class Service & Support;
Should my Team or I be able to make your experience with TV PLUS
more enjoyable, please don’t be shy to let us know...**

5. Music
6. Web
7. Volume -
8. Volume +
9. Previous
10. Next
11. Home
12. Return
13. Navigation Arrow keys
14. OK
15. Menu
16. Mouse
17. Numbers (0~9)
18. Characters Switching Key
19. Delete

Please Note:

Although the standard remote will operate all functions of the device, it is highly recommended to have a wireless Air / Mouse Keyboard and Gamepad to take full advantage of all of the potential of the Android operating system on your device.

We have a full range of options that are factory matched to your device so you can expect the very best functionality without compromise. Please contact us or visit our on-line store for more information.

3. Internet Connection

Please be Advised: We are unfortunately not responsible for your Internet service or equipment! We are always pleased, however all Internet related issues must be directed to your Internet service provider. We recommend a speed test at www.speedtest.net on your PC or MAC to verify your actual Internet DL Speed.

If you are having issues connecting, are receiving repeated errors trying to stream, buffering messages appear on (several different) media streams (it is normal on mild occasions) the issue is either your router, it's positioning, distance or the quality & speed of service from your existing Internet provider.

The TVP-1500A/1600A requires a stable & consistent Internet connection! If your Internet service and or equipment does not meet the minimum requirements you will experience repeated errors, buffering & interrupted streaming and may ultimately damage the device software, which is NOT covered under the software warranty.

- a) Please ensure that you have sufficient Internet bandwidth (10Mbps), is a minimum requirement. TV PLUS may work with less but with limited performance and frequent buffering.
- b) A proper & current wireless router optimized for Media Streaming & Hi Gain Wi-Fi range capabilities (when connecting by Wi-Fi) is required to avoid connection and wireless bandwidth issues. Please Note: the further away you are from your router in Wi-Fi mode the more your Bandwidth (SPEED) will be reduced.
- c) An Ethernet connection provides the most direct connection to your Internet service and has no loss of bandwidth regardless of distance and always provides a much better overall experience. Ethernet connections eliminate the possibility of interference and low bandwidth issues related to poor positioning of your router within your home. Long Term, consider having your router relocated to nearby your TV PLUS System to make a direct Ethernet connection.

If you're not satisfied with your current Internet provider or feel you are simply paying too much, contact us at www.XACTTV.ca or 1-855-445-6060

Go to the Set-Up Icon on the X ACT TV Home Page

At first, do not concern yourself with all the various Remote Control Functions & Options. You must CLICK and NOT HOLD the remote control buttons

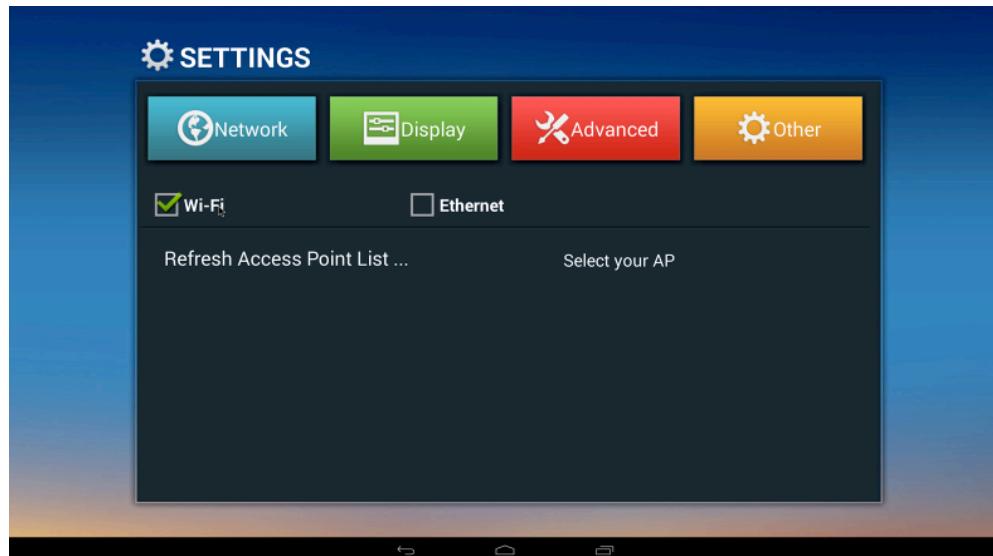

Using the standard IR remote control, use the Navigation Arrow keys to highlight the Set-Up icon group and click OK

Please Note: Your primary remote keys for every day use will be the NAVIGATION ARROWS, the OK and the RETURN KEY. If you see a mouse pointer (arrow head) on your screen you have accidentally activated the mouse function; click the mouse key button once to de-activate. This function is used to reach certain features and/or screens within the Android operating system. To take full advantage of the Android features & search functions a wireless Air Mouse / Keyboard is highly recommended.

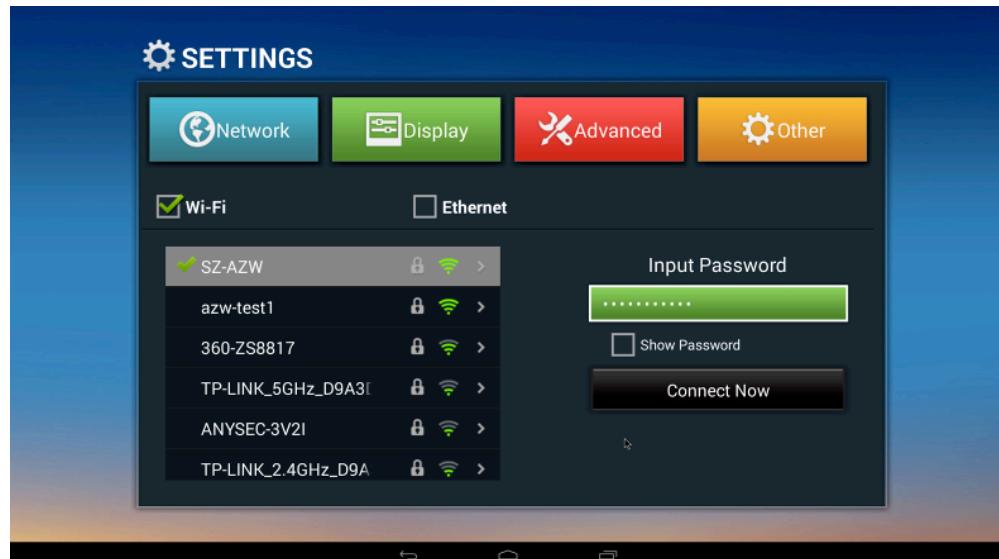

Choose Your Connection Method

3.1 WIFI - Wireless Connection Set-Up

Home Screen → SET-UP → TV PLUS SET-UP → Select “Wi-Fi” to open WIFI function

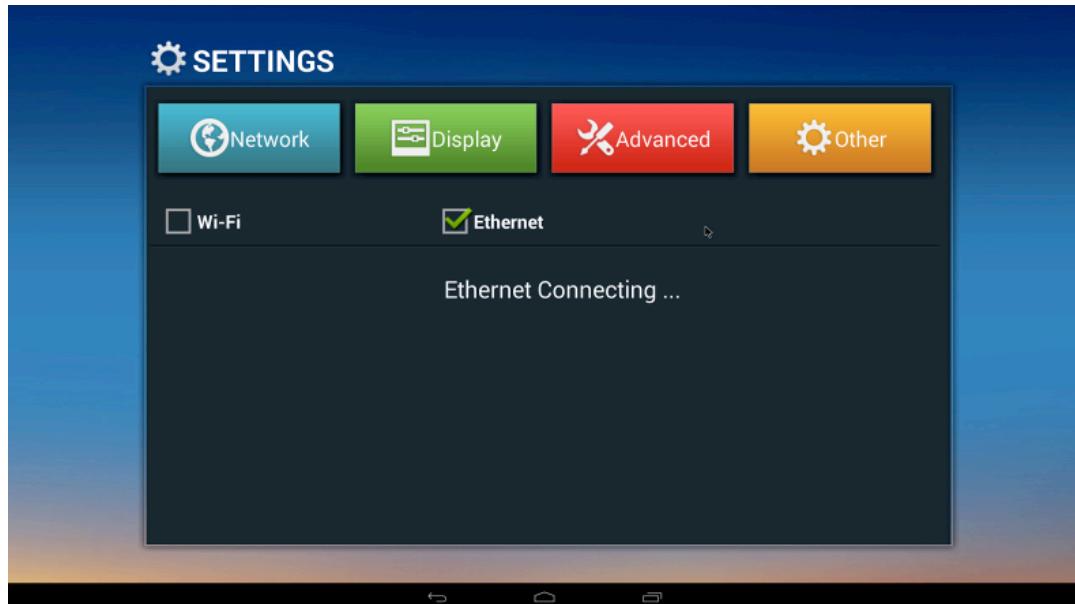

Choose your hotspot (your Home Wi-Fi-Network) → Input your Password
(Be sure to observe any capital letters & punctuation) → Connect to the network

3.2 Ethernet – Wired Connection (preferred when possible)

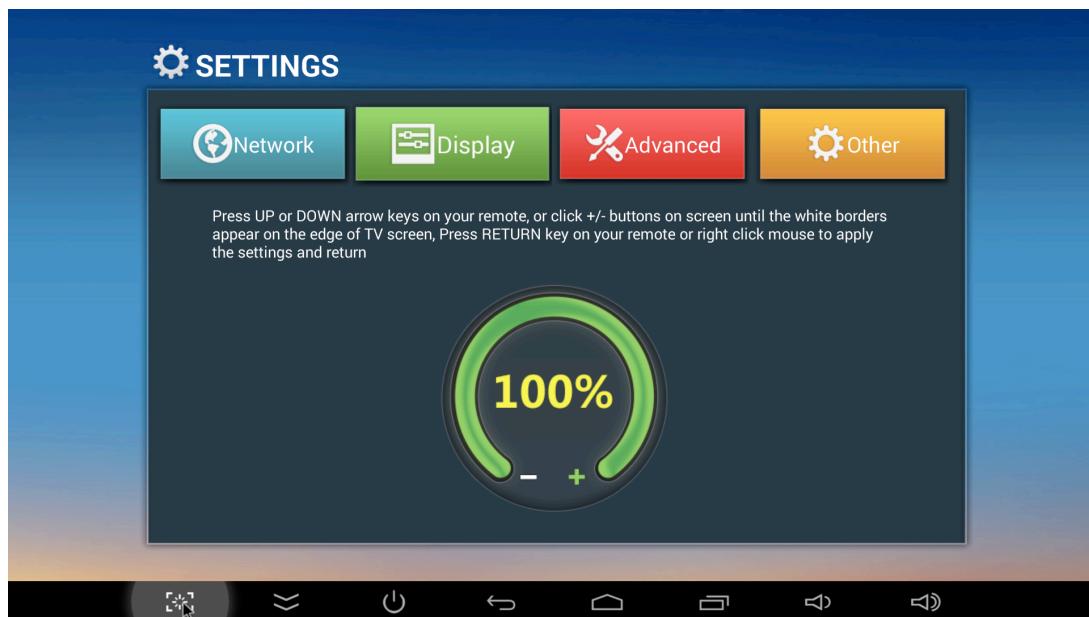

First, Insert Ethernet network cable (Ethernet cable sold separately)

Home Screen → SET-UP → TV PLUS SET-UP → Network → Select “Ethernet” to connect to your home network and the Internet

4. Display & Screen Size

5. Home Screen → SET-UP → TV PLUS SET-UP → Display → Select “Display Position” Use the Up / Down navigation Arrows to adjust your screen size.

Please Note: You should have no empty space around the perimeter of your screen & should be able to see the clock / time in the top right corner of the Android/ X ACT TV Home Page
